THEIR EXPENDITURES.

Many Did Not Know of Its Existence -Commotion Created in Goldfield.

It has developed that there is a law on the statute books of Nevada which contains the following section, which is taken from chapter 108, Nevada statutes

Section 1-"All foreign corporations doing business in the state of Nevada shall, during the month of January of each year, publish a statement of their last year's business in some daily newspaper in the state of Nevada for a period of one week.

"The penalty for not complying with the above law is a fine of \$100 for each month that the published statement remains unfiled with the several assessors of the state."

The existence of this law has not been generally known by owners of mining property in the state on the west. The fact was brought out quite forcibly by one of the Goldfield papers a few days ago and it raised quite a commotion in

The purpose of the law is to protect

Those who did generally sent along a clipping from the newspaper in which the required advertisement had been made. Some sent whole copies of the paper and from these he clipped the ad and filed it with the affidavits. He remarked that the mining corporations

The purpose of the law is to protect investors as much as possible against the operation of fake mining concerns, and provides for the publication of the amount of receipts and expenditures at least once a year in the manner stated. At the assessor's office in Esmeralda county, inquiries made by the Goldfield Sun developed that very few people had complied with the law.

Bill Ingalis of the Palace, who was sheriff of Esmeralda county for 10 years up to Jan. 1, 1905, when approached on the subject, said that he knew that the law existed, but that while he was in office there were but very few, approximately, who filed their statements with him as the law required.

AN ACTIVE CAMP.

Citizens of New Nevada District Have Asked Government For a Postoffice.

WISER IS ENTHUSIASTIC.

Well Known Mining Man Returns and Tells What is Going on in Camp.

Butte, the new mining camp recently opened up in southeastern Nevada, O. Wiser, former superintendent of the Annie Laurie mill at Kimberly, Utah has returned to the city thoroughly convinced that Gold Butte is going to develop into a camp of prominence. He has reached this conclusion after having spent the four weeks that he was there by doing a lot of prospecting on his own account and investigating the

The operations of the Nevada Gold Eutre Mines company, which is com-prised of Sall Lake talent; and the Granite Nevada Gold Mines company, comprised of California and Arizona taient, has attracted so much atten-tion that a good many prospectors and mining men are making that way and the population of camp of Gold Butte is growing almost daily, while the chances are lavorable for it reach-ing up into the numbered within a very short time. In fact, Mr. Wiser pre-dicts quite a healthy boom for Gold

tablish a general store in the camp and the citizens of the district have made application to the postoffice department at Washington for the establishment of a postoffice to be called Goldbutte, with semi-weekly mail service.

Mr. Wiser says the management of the Gold Butte mines has a force of four men at work.

At the present time the men are engaged in sinking some shallow shafts, making open cuts and of grwise doing a whole lot of energetic prospecting on the surface before starting permanent work in the tunnel, which will eventually cut all the ledges crossing the property. Nearly all the openings on the surface, Mr. Wiser says, show free gold, and Supt. Gibbs is taking out ore for shipment from what is known as the Lone Star ledge. The ore looks good and will probably go anywhere from \$60 to \$100 to the ton, possibly more. About eight inches of the Lone more. About eight inches of the Lone Star vein seems to be very rich. The sacks in which this ore is to be ship-ped were sent to Gold Butte this af-

The most significant occurrence of the past few weeks, Mr. Wiser reports, is the discovery of a big ledge of rich copper of by Henry Gentry and associates of St. Thomas. This ore was found over in what is called the lime belt, about a mile from the main Gold Butte workings. Mr. Gentry has all of three cars of ore ready for shipment to the Salt Lake smelters, so it looks as if Gold Butte would become a producer of copper as well as of gold.
